Professional Summary

Computer Science graduate with a strong foundation in AI/ML, focused on building and optimizing predictive models and intelligent systems. Experienced in working with real-world datasets, applying machine learning techniques, and improving model performance through experimentation. Proficient in data preprocessing and model tuning to develop efficient solutions, with strong problem-solving skills and the ability to communicate insights effectively.

Education

VIT University, Bhopal

Sep 2022 – May 2026

Bachelor of Technology in Computer Science and Engineering

CGPA: 8.06/10.0

Technical Skills

AI & Machine Learning: Supervised/Unsupervised Learning, Regression, Classification, RAG, Flan-T5, NLP

Data & Modeling: Exploratory Data Analysis (EDA), Feature Engineering, Model Evaluation & Tuning

Programming & Tools: Python, SQL, C++ (OOP), Pandas, NumPy, LangChain

Core Skills: Problem-Solving, Process Optimization, Cross-Functional Collaboration

Professional Experience & Leadership

Sciaku Pvt Ltd (AI/ML Intern)

Oct 2025 – Jan 2026

- Developed and optimized machine learning models in an agile AI environment, improving system performance by 20% for 8000+ users.
- Communicated complex data insights to technical and non-technical stakeholders during deployment.

Technical Team Member -IOS CLUB

- Successfully Managed Game Flix 2.0 (Treasure Hunt) at ADVITYA 2024, coordinating execution
- Maintained and updated the club's website, ensuring functionality, performance, and content accuracy

Event Manager -VITronix Club

- Implemented engagement strategies aligned with business goals, managing events for 200+ participants.
- Successfully organized three major events, demonstrating teamwork and strategic planning skills.

AI, Analytics & Automation Projects

Market Trend Analytics (RealtyPrice Predictor) [\[GitHub\]](#)

- Collected, analyzed, and interpreted 5,000+ records to generate insights for digital marketing campaigns.
- Identified problems and root causes, supporting effective data-driven decision-making processes.
- Trained Gradient Boosting Regressor ($R^2 = 0.88$) to handle variance and improve model performance.
- Extracted key price-driving features to optimize strategies and enhance marketing operations.

Campaign & Performance Dashboards (CricAnalysis - WPL) [\[GitHub\]](#)

- Developed and maintained dashboards tracking performance across 500+ records, enabling decisions.
- Computed 10+ core KPIs, converting complex statistical data into clear and concise reports for stakeholders.
- Applied Python and Pandas to automate data pipelines, improving workflow efficiency and scalability.
- Streamlined analysis processes, reducing manual effort by 60% and enhancing overall productivity.

AI-Powered NLP System (FlanQuery) [\[GitHub\]](#)

- Built an end-to-end RAG AI system using Flan-T5-Large, achieving 90%+ accuracy on user queries.
- Integrated FAISS vector search and embeddings, reducing system latency to under 500 ms.
- Deployed a conversational AI handling 100+ queries per session, ensuring efficient interactions.
- Demonstrated strong technical expertise in building scalable AI systems and digital tools.

Languages and Interests

Languages: English (Fluent), Hindi (Native)

Interests: AI/ML Research & Emerging Technologies, Sports Analytics (Cricket Strategy), Open-Source Contributions, English & Hindi Literature.
